

UPM RAFLATAC

FOOD SAFETY POLICY

UPM Raflatac offers high-quality self-adhesive paper and film products including label materials, graphics solutions and removable self-adhesive products. We deliver our sustainable and innovative products through our global network of factories and distribution terminals. We are committed to quality and continuous improvement in all aspects of our business. We want to be **partner of choice** and together with our customers, brand owners and other stakeholders build **a smarter future beyond fossils**.

As an integral part of our processes, UPM Raflatac is committed to providing our customers with a wide range of self-adhesive products designed and manufactured to be used as a part of various food packaging systems. This is achieved by meeting the relevant **regional regulatory requirements** and adhering to established **product safety and quality standards**. UPM Raflatac strives to mitigate applicable product safety risks and provides transparent product safety communication as required by our customers.

The food safety management system used by UPM Raflatac is based on ISO 22000, FSSC 22000 or BRC GS standard and is integrated into a company-wide, certified ISO 9001/14001/45001 management system. The management systems form the basis of compliance to the regional GMP-requirements related to food safety. Certificate documents are available in our web pages at www.upmraflatac.com/products-and-services/product-safety-and-compliance/management-system-certificates-and-policies/

Key food safety targets are set annually by UPM Raflatac management as part of the business strategy. The continuous development and training of personnel is an important aspect in supporting and achieving the business objectives, food safety targets and consumer safety. The performance of the food safety system is monitored, reviewed, communicated and improved by regional Food Safety Teams.

Antti Jääskeläinen

Executive Vice President, UPM Raflatac
